

Your Science. Our Solutions. Together Ahead.

Aragen Life Sciences is a leading Contract Research, Development and Manufacturing Organization (CRDMO) offering end-to-end integrated and standalone solutions for small molecules and biologics. From concept to commercial, we transform your ideas into solutions for better health for humans, animals and plants.

Established in 2001, we operate through a global network of six sites with a team of 4200+ employees including 450+ PhDs. Our expertise and experience have enabled over 400+ customers in advancing their research programs from discovery through commercialization.

Aragen's innovative mindset, state-of-the-art infrastructure, flexible business models have enabled us to serve large pharmaceutical or biotech, agrochemical, animal health and performance chemical industries globally. Our purpose, 'In every molecule is the possibility for better health' motivates us to drive the success of your programs, so that we can together transform hope into health for millions of people around the world.

Snap Shot

- 20+ years track record of providing discovery, development and manufacturing services
- Integrated service platform for small molecules and biologics
- Six world-class R&D and manufacturing campuses in India and USA
- Audited successfully by global regulators such as US FDA, EMA, AAALAC and major life sciences partners
- 4000+ scientists, 450+ PhDs, 400+ customers globally
- Robust internal ecosystem of support functions such as IT, SCM, HR, Quality, EHSS to ensure smooth operations and drive efficiency

Business Verticals

	Discovery		Development & Manufacturing	
Small Molecules	Medicinal Chemistry	PROTAC Chemistry	Custom Chemical Synthesis	HPAPI
	Synthetic Chemistry	Cell and Protein Sciences	Process R&D	Analytical / Stability Studies
	ADME Studies	DMPK Studies	Tox batch Manufacturing	Process Validation and DMF Filings
	Integrated Programs	<i>In Vitro & In Vivo</i> Pharmacology	Regulatory Tox Studies	Fine Chemicals
	Pre-Clinical Efficacy	Bio Analysis Studies	Formulations / Pre formulation	Commercial APIs / Intermediaries
	Exploratory Tox Studies	Analytical Studies		
Biologics	Cell Line Development	Molecular Biology	Regulatory Tox Studies	Cell Culture Manufacturing
	Antibody Discovery	Protein Sciences		

← 'Follow the Molecule' Strategy: Multiple Entry Points for Clients →

Discovery Services Overview

- Expertise in small molecule discovery
 - PROTAC chemistry, nucleotides & nucleosides, peptides, lipids, photo-redox and flow chemistry, deuterated compounds
 - DMPK, ADME, Bioanalysis, PCET, *In vitro/In vivo* studies; Cell and Protein Sciences and Protein analytics
- Integrated biologics facilities in SF Bay area offering cell line development, bio-production, protein analytics, anti-body discovery
- Disease area focus: Oncology, CNS, Pain, Inflammation, Fibrosis and Metabolic disorders
- 3 AAALAC accredited animal facilities in India and US
- Pre-clinical GLP safety assessment study capability

Development and Manufacturing Services Overview

- Expertise in non-GMP/GMP grade key starting materials (KSMs), advanced intermediates and active pharmaceutical ingredients (APIs) from kilo lab to plant scale
- 70+ clinical and commercial programs supported annually
- Chemical development solutions delivering lab, pilot, early/late-stage development, and commercial manufacturing
- 2 manufacturing facilities with 11 production blocks capacity >360 KL
- Growing portfolio of pre-formulation and formulation NCE projects
- USFDA approved Analytical facility with 21 CFR Part 11 compliant systems maintained under cGMP conditions

Aragen Advantage

Customer Centricity

We place equal efforts and focus on every program, irrespective of the size of the project or the customer, working as an extension of our client's R&D team, taking full ownership of their program.

Innovation Culture

Our rich talent pool of scientific professionals and state-of-the-art facilities provide us with the expertise and capabilities to drive innovation for our customers.

'Services only' Business Model

We collaborate but do not compete. We are a pure-play service provider and our goal is to partner with our customers in their pursuit to deliver better health solutions. This 'services-only' approach – with no internal programs or stake in the IP assets of other companies - has helped us forge long-standing partnerships from discovery through development.

Strong Safety and Sustainability Focus

As we advance our client's R&D project, the safety of our people, the well-being of our communities, and the protection of our environment are integral to our responsibility as an organization. We foster a proactive culture of safe behavior and risk mitigation and are working on developing a sustainable green supply chain.

Awards and Accreditations

Great Place to Work certification for the 6th consecutive year

1st Indian CRDMO to receive approval for greenhouse gas emission reduction targets

2024 Global Customer Value Leadership Award for excellence in drug discovery and development

Ranked amongst top 1% of companies globally in 2024

Climate Change Ranking: B
Water Security Ranking: C
